

## Legacy Audio to Showcase Calibre Monitor at Capital Audiofest 2018

(Springfield, IL)- Join Legacy Audio in the Atrium Level Montgomery Room at Capital Audiofest 2018 to hear the new [Calibre](#) monitor, a high resolution speaker that raises the performance bar for what a compact speaker can do. Calibre is designed to meet and exceed the stringent high performance standards of recording studio professionals and bring a new level of resolution to audiophiles in a compact design.

Legacy Chief Engineer, Bill Dudleston, on the development of the latest Legacy Audio offering:

*"I had but one thing in mind with Calibre- to build the highest resolution compact speaker available anywhere. Merely three inches taller than our Studio HD, it uses our high power handling 4" AMT ribbon, a precision 7.5" custom midrange/midbass built in Florence, Italy and the best 8" bass driver available with a full inch of displacement capability. Offering extreme dynamics and wide bandwidth, the clarity is the best I've ever heard in a compact design. While efficient, it is designed to sail along with 500 watt peak inputs. Legacy has always been known for our huge soundstage- but this time it's coming from a small box."*

Calibre is a very high density package, weighing in at 50 lbs each. This mass is owing to the enormous drive motors and a 1.75" thick front baffle. Two 8" mass loaded acoustic radiators are mounted on opposing sides to eliminate port noise and cancel resonance. Full specifications are available on the Legacy website [here](#).

MSRP: \$5,500/pr in standard finishes

Calibre is currently available for order through any of Legacy's domestic dealers or international distributors. It is available in a wide variety of décor friendly wood veneer finishes and includes a premium Black Pearl front baffle.

## Celebrating 35 Years of Excellence

Legacy Audio has established reference level performance in home theater and audiophile settings since 1983. The rigorous quality standard is the same for our flagship commercial doubleHELIX system as our Studio HD bookshelf system.
